FORESTS OF FLORIDA.

A Weird Region Filled With Wild and Savage Animals.

THE PARADISE FOR SPORTSMEN.

Game Fish Abound in the Streams and Along the Coast Line.

VAST SOUTHERN GRUESOME SAVANNAS

Notwithstanding the steady exploration of Florida by scouts for land companies, railroad engineers, prospectors for phosphate mines and adventurous sportsmen in search of new hunting grounds, yet there are thousands of square miles in the extreme southern portion of the State which are rarely trodden by the foot of the white man, and which are veritable zoological gardens in which feral animals are as tame as ever they were in the island home of Robinson Crusoe.

The work of opening these wilds is now being pushed forward by drainage and canal companies, says a correspondent in the Washington Star, but it must be many years before they can reclaim the vast southern savannas and render them fit for human habitation.

One of the wildest and weirdest regions thus far discovered in the State is the lake known as Jane Green swamp or Sawgrass lake, which has an area of at least 300 square miles and contains the finest body of

cypress trees on this planet.

This is a genuine sportsmen's paradise, wild animals being numerous and so fearless through their unaequaintance with man that a hunter has actually to kick some of them

out of his way before they will move.

Parokeets scream on almost every bough
and move in dense flocks, like our common
black birds: flamigoes, ibises, roseate spoonbills, pelicans and other aquatic and wading birds haunt the margins of the lake at all times, and raccoons and oppossums, bay lynxes, otters, foxes and marsh hares are abundant enough to arouse the avarice of even an amateur trapper.

Wild Animals There in Abundance. Deer, bears and pumas are numerous on

the uplands, and turkeys baunt the contiguous forests where mast is abundant. Snakes are also unusually common, every water hole and clump of bushes seeming to have its own colony. One is likely to see over 100 within an hour or two, and probably three times that number in a day. The most numerous species is the water and upland moccasins, but rattlesnakes are also very abundant, and king, whip, chicken and blacksnakes are frequently encountered. When the ophidians are thick they exhale a rickening odor, which produces vomiting in some persons, this being particularly true of rattlesnakes and moccasins.

The lake lost much of its water recently, owing to extremely warm weather and a scarcity of rain, and this torced the fish to seek refuge in shallow pools, where they furnished a feast to owls, buzzards, 'coons and 'possums, snakes and saurians. Thousands of fish could be seen fluttering about in the last stage of exhaustion, while thousands more lay putrifying on the margins of the lake or were being devoured by foxes,

roons or 'possums.

The latter creatures had probably never seen a man until they met Judge Harrison's party, and they were so indifferent to the inters of this expedition that they scarcely deigned to glance at them as they passed by.

All animals in the region displayed the same fearlessness, the deer merely scrutinizing them with fatuous curiosity, the bears snuffing the air, as if trying to decide to what class of creatures they belonged, and the hugest alligators in Florida paying no

Many Nests of the Saurians

The cone-like nests of the saurians are one of the most marked features of the landscape, as they are extraordinarily abundant and seem to have been in existence for many years. Young reptiles are, as a con-

many years. Young reptiles are, as a consequence, very common, and as they are always ready for a fight a person must be careful not to approach them too closely.

One of them seized the trouser leg of a young man in Judge Harrison's exploring party, and he, thinking it was a snake, became almost insane with fear and dashed through brake and briar with a speed that could only be developed by terror, but as the saurian clung to him with the tenacity of a sandspur the poor fellow was in danger of dropping dead from horror when his friends overtook him and relieved him of hir terrifying companion.

When rescued he was as pale as the tradi-

tional ghost; the perspiration rolled off his body in streams, and he was so weak that he could scarcely stand or speak. It took bim some time to recover from his needless terror, and it was many a day before he could calmly hear his comrades refer to a "three-inch gator scaring a green English-The wild hogs so common on the gulf

coast of Florida have not yet migrated as far toward the interior as Sawgrass Lake, but some hunters hope they may soon find their way toward it in order to destroy the numerous snakes that make its borders a scene of horror.

Mosquitoes Fly in Large Swarms.

Mosquitoes fly in swarms there during the rainy season, and are so persistent in their attacks that explorers are compelled to make their beds between two or more fires if they would get any sleep. These winged plagues, like the snakes and saurians, are in a state of hibernation during the winter, and do not appear in seriously annoying numbers until May or June.

Sportsmen can, therefore, safely visit this region between December and April, and revel in such venatic adventures as they never thought of in their wildest dreams. They must take guides with them, or they are likely to wander for days among the broad savannas, which seem to be a vast monotonous level of grass and water or a

jungle of cypress.

The cypress trees alone are well worth a visit, as they are the largest in the State and compare favorably with some of the redwoods and spruces of the Pacific coast. Many of the giants are one mass of tillaud-sia, or Spanish moss, and present a funereal aspect in their dense covering of gravish black. Air plants are very abundant throughout the region, owing to the humid-ity of the atmosphere, and several species of flora unknown farther north are conspic nous in the forests. The large tracts adjoining the swamp are interesting to all students of nature, but no persons will ex-tract as much delight from them as the lover natural history and of the rod and gun.

Nimrods Can Find Exercise. Another region which should prove ex-ceedingly interesting to the disciples of Nimrod and Walton is New River inlet, in the extreme southern portion of Florida. This was a famous resort during the war for the deserters from both armies and those the deserters from both armies and those who fled from the Confederate conscription. Many a dark deed is associated with the name of the place, for beach combers and pirates made it their headquarters during the early occupation of Florida by the United States, and they were not driven out until the Civil War was over. The inlet is famous for the vast quantities of fish and turtles which haunt it at all seasons of the year, and the readiness with which such species as the tarpon, jewfish, sea devil or vampire ray, barracuda, Spanish mackerel, tunny, dolphin and their Southern congeners may be captured at all stages of the tide.

It is one of the most noted places in the State for green turtles, large shoals being found there during stormy weather, owing to the protection which it affords them and the depth of its water. It was formerly a great rendezvou for the Seminole Indians, when they were in their pristine glory and diving after turtles was one of their favorite summer amusements and their principal means of filling their larder while they waluables cheerfully given.

Go With the People

To Javen's Elite Gallery, 516 Market st. Cabinets, \$1 per doz. Open all day Thanksgiving.

LADIES' beaver cloth, flannel-lined, leather-foxed, lace shoes, at \$1 at Simen's, 78 Ohio street, Allegheny, Pa.

were diving after the numerous Chelonia midas that thronged it. One day the squaws on shore and the old men set up of a sudden a cry of horror and shouted "man enters" in their most stentorian tones. The divers knew too well what that meant, and wade the result of t made the most frantic efforts to reach land, but the hungry shoal of sharks dashed into their midst before they could get ten yards away and were shon engaged in slaughter-ing them as rapidly as if they were so many muller

mullet.

A few reached shore, but most of the young braves were slain and devoured the cyes of their parents. Among those destroyed were the only son of the chief and the eldest son of the principal medicine man, and so keenly did these feel their loss that no Indian should ever again haunt the shores of the inlet and that its waters should be known as the "Very Bad Medicine Water."

The Seminoles have carefully avoided the place since that time, and this fact, combined with its isolated position, is the main reason for its abundance of fur, fin and feather. Being strangers to man the ani-

feather. Being strangers to man the ani-mals have no fear of him and are, therefore, easily captured.

Tarpon and Other Fish Plentiful. Tarpon are often as thick as mullet are in Charlotte harbor or Tampa bay, and the huge vampire ray is as common as jewfish are elsewhere. Alligators are very abundant in the swamps back of the inlet, and the Cuban crocodile, whose presence in Florida has so often been doubted by a certain class of writers, is very common in

its waters,
This species of the saurian family may be readily distinguished from its fresh water congener by the length and sharpness of its snout, the projection of two teeth in the lower jaw into two orifices in the upper, and the more lithe and active appearance of the body. It is also maritime in character, being rarely found far from the seacoast, and is a bold and fearless swimmer in the stormiest seas. It may frequently be seen passing from the outlying islands to the mainland, or making voyages of dis-covery in the open Atlantic. Being far more active, pugnacious and daring than the alligator, hunters do not care to assail it unless they have every advantage, yet specimens are captured alive occasionally by harpooning them in deep water.

AFTER HER CHILDREN'S INSURANCE.

A Woman Poisons Her Four Children for

the Sake of Their Policies. LOUISVILLE, Nov. 24.-It is believed that four children have been poisoned in this city to secure insurance money. One year ago Thomas Austin, his wife and five children lived at 106 Eleventh street. One by one the children died until one remained. The father and the remaining

child were reported dying vesterday.

In each case the regular physician gave typhoid fever as the cause of death. Each child had been insured and the money was paid by the insurance company immediately after death. The amount on each ranged from \$200 to \$500. The neighbors began to talk and finally the attending physician called in a well-known doctor, D. C. Smith, who made a diagnosis and concluded that the cause of the illness of the father was arsenical poisoning. The Coroner will be asked to have the remains of the children exhumed and an analysis of the stomachs made. The mother is alive and well. The insurance policies were all made out in her name. She refuses to talk.

THE MOORHEAD WELL

Is Showing From Forty to Fifty Barrels a Day in the Gordon.

HOW IT LINES UP WITH OTHERS.

Wallace No. 2 Taps the Fifth and Starts Off at 100 Barrels an Hour.

REVIEW OF THE WORK IN THE PIELD

The well which by long odds has been attracting the attention of the McDonald operators for several days is on the W. B. Moorhead farm, and is located about a mile west of south from McDonald station. It elongs to the Venture Oil Company, which is the producing end of the Wheel-ing Gas Company. It has been reported at various times as being in the Gordon sand, and the reports from it have been unreliable. Yesterday morning THE DISPATCH stated that it would make about two barrels an hour from the Gordon sand, and this has been definitely ascertained to be its proper rating. The well was visited by a number of experienced oil men yesterday who all placed it as good for from 40 to 50 barrels a day. It was not through the Gordon fand yesterday, but is being drilled on down to the fifth. This well is conclusive proof that there is oil to the south and southwest of McDonald, and it is in that territory that active opera-tions may be looked for when the McDon-aid field has been thoroughly drilled over. What makes the Moorhead well so im-portant is the fact that it is the only well between McDonald station and Venice, two miles farther south, which has yet been drilled to the Gordon and

drilled to the Gordon sand. How It Lines Up. The well lines up with the fifth sand wells near McDonald station, the Nevey No. 1, the Miller No. 5 of Gartland & Hays, and the Elliott No. 1 of Guffey, Murphy & Galey. By lining up tarther east it covers the Rend well, the Glenn farm wells and Mathews No. 1. For this reason the owners believe that they may strike an extension of one of these fifth sand belts, and as there is nothing between the Moorhead and the Rend, or the former and the fifth sanders at McDonald station the chances are good for getting something in the fifth said. If it shows for even a paying well there will doubtless be a dozen others started

around it within a week.

A short distance west of the Moorhead, Greenlee & Forst are down 1,500 feet on the J. R. Gladden farm. They expect to get the Gordon sand next week. McManus & Co. on the Richard Gladden farm, east of the Moorhead, are down 1,100 feet. These two wells should definitely outline the value of the territory on either side of the walue of the territory on either side of the Moorhead. The Royal Gas Company's No. 1 on the Moore farm at Venice has not been drilled any since last week, and is still a long distance from the fifth. They are ready to drill at their Nos. 2 and 3 on the Moore and at No. 2 on the Patterson farm. Moore and at No. 2 on the Patterson farm. These wells are being put down with the ex-These wells are being put down with the expectation of getting gassers. The Pittsburg Oil Company's well on the Reed farm is still full of salt water, which, one of the owners stated yesterday, came from the stray above the Gordon sand. The salt water will probably be cased off this week, and the well drilled on down to the fifth as rapidly as possible. Mellon & Co. will probably get their Nos. 2 and 3 started on the McCarty farm early next week.

Another Big Fifth Sander. The Oakdale Oil Company's No. 2 on the Wallace farm, located between the Baldwin and the Elliott farms, finally reached the and the Elliott larms, inally reached the fifth sand at an early hour yesterday morn-ing, and almost as soon as the bit broke through the shell the well began to produce at the rate of 100 barrels an hour. It was still keeping up this pace at a late hour yesterday afternoon and is showing for one of the greatest wells in the field. The bit is reported to be only a few inches in the sand. This well is located about 900 feet southwest of No. 1 Wallace, which is still doing over 100 barrels an hour. No. 3 on the same farm was only a few feet above the fifth yesterday afternoon and they expected to reach the pay some time last evening. The No. 4 Walface, belonging to the same company, is down 2,200 feet, and should be completed this week. Wallace No. 5, is drilling at 300 feet. The Oakdale Oil Company has enough faith in this farm to risk the drilling of six more wells, and already the rigs have been com-pleted for Nos. 6, 7, 8, 9, 10 and 11. They are all located on the southwest end of the farm, and just east of the Elliott, Morgan heirs and Sam Sturgeon farms. These will all be rigged up this week and spudding by the first of next. The Oakdale Oil Company's No. 2, on the Morgan heirs farm, is down 2,150 feet, and will probably be finished up this week. Their No. 3, on the same property, is down 1,465 feet, and No. 4, 1,100 feet. The No. 3, on the Sturgeon heirs farm, also leased by the Oakdale Oil Company, is drilling at 1,100 feet; No. 4 at 700; No. 5 at 250, and No. 6 is being rigged up.

Progress of Other Wells, Guffey, Murphy & Galey's No. 4, on the Elliott farm, is down 2,100 feet, and should be compelled the last of this or the first of next week. The same parties' No. 5 on the Elliott is drilling at 1,900 feet. Elliott No. 6 is down about 1,150 feet; and No. 7, which 6 is down about 1,150 feet; and No. 7, which has only been going a few days has a hole 725 feet deep. Guffey, Murphy & Galey also have the Sam Sturgeon farm, joining the Elliott on the east under lease. They have completed two good wells on it, and are drilling six more. No. 3 on this farm is down 2,000 feet, and will get the Gordon this week. No. 6 follows with a depth of 1,050 feet, and the others are between that and 200 feet in the others are between that and 200 feet, and the others are between that and 200 feet in depth. The Forest Oil Company has started to drill No. 2 on the J. M. Glenn farm, which joins the Wallace on the east, and they have a rig up for No. 3. The same company's No. 2 on the Robert Glenn farm is down, about 600 feet and their No. 2 on company's No. 2 on the Robert Glenn farm is down about 600 feet, and their No. 2 on the Etta Glenn farm is spudding. The Forest expects to complete its No. 7 on the Shaffer farm in southwest McCurdy to-day. They have another on the same farm, No. 9, which is due to get the fifth sand this week, while Nos. 2 and 10 on the Shaffer should get the pay in the fifth early next week. The No. 1 James McGregor, of the Forest Oil Company, should also be in the fifth sand before next Sunday. W. L. Mellon & Co.'s No. 4 on the Neeley farm was on top of the fifth sand last night, and will be drilled into the pay to-day. This is the only well in the field which is producing any oil from the sand. It has been making about 60 barrels a day from the above stratum. Hoffman & Co.'s No. 3, on the Moore farm, also in Southwest McCurdy, is down about also in Southwest McCurdy, is down about 400 feet. Back of Oakdale.

Back of Oakdale.

There are several wells back of Oakdale which are slowly but surely reaching the point when their venturesome owners will know whether they are the proud possessors of gushers or only mediocre producers. The Woodland Oil Company's No. 2, on the Gamble farm, was drilling in the sand yesterday morning, but at noon had not reached the pay. Forst & Greenlee have finished up their Nos. 2 and 3 on the Gamble farm. No. 2 is good for about 75 barrels a day, and No. 3 Woodland Oil Company's No. 2, on the Gamble farm, was drilling in the sand yesterday morning, but at noon had not reached the pay. Forst & Greenlee have finished up their Nos. 2 and 3 on the Gamble farm. No. 2 is good for about 75 barrels a day, and No. 3 will produce probably 125 barrels every 24 hours. Jennings & Co. are down 1,100 feet on a lot located 600 feet northeast of Fisher & Co.'s well on the slaughterhouse property. Fitzgibbons & Co. are rigging up on the Kennedy farm, about a quarter of a mile back of Oakdale. Jennings & Co. are on top of the Gordon near the slaughterhouse well, and on the Welsh property the same parties are down 1,500 feet, and Mechling & Shaffer are rigging up their No. 1 on the Miller farm. The J. P. Kyle Oil Company have made a location for No. 2 on the A. C. Wettengel farm. S. J. Fisher & Co. will shoot their well on the McKee lot back of Oakdale. It is right on the Gordon.

Williams & Hogue were fishing for a set of tools on top of the Gordon yesterday on the Walker farm. The Forest Oil Company's No. 5 on the W. C. Herron farm is 1,800 feet deep and they have a rig up for No. 6. Moon Township Citizens Prepare to

Work at Willow Grove.

Willow Grove is not being neglected in the rush for wealth which seems to permeate the southwest region. Willow Grove is located about a mile northeast of McDonald and half way between the latter place and Noblestown. Within the last week or two operators have become imbued with the idea that there is a rich streak lying east of the Sturgeon, Elliott, Mevey and Wallace farms, which goes through Willow Grove, and as a consequence a score of rigs have been put up within the last few days. The Mansfield Oil and Gas Company is spudding on the Davis lot. F. M. Aiken & Co. are down 1,000 feet on the Patterson property. Phil-1,000 feet on the Patterson property. Phillips & Co. have completed a rig on the Faraday lot. A rig has just been finished on the Mankadick lot by the Willow Grove Oil the Mankadick lot by the Willow Grove Oil Company. Crowley Bros. & Co. also have a rig on the Mankadick lot. The Toronto Oil and Gas Company has a rig up on the Thomas Bowles farm. On the George McLain lot a rig has been put up by the Liberty Oil Company. The Mohawk Oil Company is drilling at 1,000 feet on the Mitchella lot. Bailey & Co. are down 500 feet on the Perandal property, and Forst & feet on the Perandal property, and Forst & Greenlee are drilling at the same depth on the Joe Gilland farm, and they have a rig completed on the P. Scholar lot. The following is a resume of Forst & Greenlee's lowing is a resume of Forst & Greenlee's operations on the Mevey farm: At No. 7 they have a fishing job on hand. No. 8 is down 1,500 feet; Nos. 10 and 11 will be cased to-day. No. 12 is drilling at 1,200 feet. No. 13 is is only 600 feet deep, and is being delayed by a bad hole. Nos. 14 and 15 are each about 1,600 feet deep, and No. 16, which is down 2,000 feet, should get the fifth sand by Sunday.

In McDonald Borough. There is a well in the borough of Mc-Donald upon which a great deal of interest in centered at present. It belongs to Wolfe, McManus & Co., and is on the Mathew Wilson lot, which is located west of the track leading from the Nickelplate coal mine. It was about a 100-barrel well in the Gordon sand, but the fifth was reached Sat-urday, and since that time it has been making 700 barrels a day. One of the owners who drilled the well stated yesterday that it was not more than eight or ten inches in the fifth sand. It will be drilled deeper into the sand to-day, providing the pipe line people are ready to take care of any increase in production of the well. The tanks at it are all full at present. The Northfield Oil Company, which is the pro-ducing end of the Royal Gas Company, is drilling two wells on the Sauters seven acres, located 400 feet southwest of the Miller No. 5 of Hays & Gartland. No. 1 is down about 1,200 feet, and No. 2 is drilling at 600 feet. Bettman & Watson's well on the Thomas lot, location south of the Mather Wilson well in between the Gordon the Thomas lot, location south of the Mathew Wilson well, is between the Gordon and fourth sands. Ewing & Co. expect to get the Gordon sand to-day on the Vincent lot in the northeastern part of the borough. Emerson & Frink's well on the Thomasy lot is drilling in the bottom of the Gordon sand and producing about 60 barrels a day. Hays & Gartland are drilling past the tools in their No. 8 on the Miller farm. Their in their No. 8 on the Miller farm. Their No. 10 is down about 800 feet. Shay &

No. 10 is down about 800 feet. Shay & Hogues well, on the Dougherty property, located half a mile east of the Rend well, is in the salt sand. Shay, Wells & Co.'s well, on the Verschuren lot, was reported to be doing 35 barrels an hour last night.

The Royal Gas Companies No. 5, on the Sauters farm, is on top of the fifth and may be drilled in to-day.

Gordiner & Co's venture on the Malt house lot at Oakdale will be in the Gordon to-day. The connections were not completed to-day. The connections were not completed yesterday in time to drill the well in. Guffey, Jennings & Co. intend to drill their well on the Mathews heirs prop-

erty deeper into the sand this morning and they expect it will go to 250 or 300 barrels

Gauges of the Wells. The gauges of the big wells yesterday showed the following to be their average per hour: Guffey, Jennings & Co.'s No. 1 Mathews, 140; their No. 1 Herron, 93; Nos. 2 and 4 Herron, 300; Bell No. 2, 60; Bell No. 4, 20; Oakdale Oil Company's No. 1 Baldwin, 32; Mathews heirs, 56; No. 1 Wal-lace, 106; No. 2 Wallace, 100; No. 1 Morgan lace, 106; No. 2 Wallace, 100; No. 1 Morgan heirs, 46; Sturgeon heirs' No. 2, 20; Guffey, Murphy & Galey's No. 1 Elliott, 20; No. 3 Elliott, 46; No. 1 Sam Sturgeon, 14; No. 2 Sam Sturgeon, 164; Forest Oil Company's No. 1 Etta Glenn, 116; No. 1 J. M. Glenn, 42; Robert Glenn, 22; No. 1 Shaffer, 18; No. 3 Shaffer, 10; No. 5 Shaffer, 9; No. 3 Herron, 40; No. 4 Herron, 130; Forst & Greenlee's No. 1 Mayor 65; No. 4 Mayor, 65; No. 4 No. 1 Mevey, 65; No. 4 Mevey, 65; No. 1 Gamble, 38; Koyal Gas Company's No. 1 M. Robb, 16; Devonian Oil Company's No. 1 Elliott, 75; Hoffman & Co.'s No. 2, Moore, 18; Woodland Oil Company's No. 1, Gamble, 32; W. P. Rend's No. 1, Rend, 14: Black & Co, 's No. 1, Sauters, 28; Miller & Co, 's No. 1, McDonald, 20; Patterson & Co, 's No. 1, 1, McDonaid, 20; Patterson & Co. s No. 1, Sauters, 23; Wheeling Gas Company's No. 1, Cook lot, 10; Guckert & Steele's No. 3, Meyey, 32; Patterson and Jones' No. 2, Kelso, 90; No. 3 Kelso, 126; Gordiner & Co.'s No. 3 Mertz, 15; Guffey & Queen's No. 1, Wetmore, 10; Devonian Oil Company's No. 1, Boyce, 110: Forest Oil Company's No. 2, Wright, 38; Davis & Brown's No. 1, 14; Thompson & Co.'s No. 1 Mormlongrig, 30; Brenneman & Co.'s No. 1 Tilmont, 25; Brown & Co.'s No. 1 Illimont, 25; Brown & Co.'s No. 1 Montgomery, 36; For-est Oil Company's No. 3 Ewing, 20. The production of the field yesterday was esti-mated at 60,000. It was brought up by the new wells and agitating the old ones. The stock in the field was reduced to

148,000 barrels.

Rising Sun Coming Up. The Rising Sun field is becoming more prominent each day. The wells are not large, but so far they have held up in a remarkable manner. Barnes & Colt's No. 1, located on the northwest corner of the G. L. Kennedy farm, half a mile in advance to the west of the Blonde farm well, will be shot Monday. As it is, the well is owing nicely, and would probably make 60 barrels a day. The southern portion of the field, as far as developments have been made, is showing much better than the north end. This same company is building a rig on the southwest, corner of the Ketchem 80-acre the southwest corner of the Ketchem 80-acre farm. This will be the farthest well of any yet to the south, and will cut a prominent figure in the new field. Mr. Colt expects No. 2 to be a good producer. The same company has procured a lease on the A. E. Stahl 80-acre tract east of the Ketchem farm, and directly south of the Blonde farm. It is said that Mr. Stahl received \$1,000 as a beause and one expects of the cil produced.

on the farm. The Sun Oil Company will shortly start drilling at No. 2 on the F. Blonde farm.
The same company's No. 1 on the Samuel
Stump farm is in the sand. The Craig Oil
Company's No. 3 on the M. Elliott farm,
marked on the oil map as the Noah Rhinebolt farm, will strike the pay some time the coming week.

G. H. Van Vleck & Co.'s No. 3, located on the east line of the Peter Yost farm, just west of the Elliott farm, will also strike the pay the coming week.

The market was again dull and weak. The Moorhead well, a mile south of McDonald, although doing only 50 barrels a day, was, as

Fight Gas Drillers.

ESCAPE PIPE DROWNED A SERMON.

They Have Also Inaugurated a War on Progressive Euchre.

MAY ASK TO HAVE THE LAWS CHANGED

A new branch of the Law and Order So ciety is being formed to combat Sunday work. It is at Sharon, in Moon township, and its parturition has been very severe but the people down there have said that Sunday observance must and shall prevail, outwardly at least, though it is thought that money will still be allowed to draw interest on Sunday.

The trouble began a week ago last Sunday when the Bridgewater Gas Company's men drilled on a gasser on the Fetzer farm. Whether from contagion or other cause, the Whether from contagion or other cause, the Arctic and other companies are said to have followed suit on the Burns and Meanor farms and in a short time the voice of prayer and praise in the sanctuary was effectually drowned, so, as an attendant says, the voice of the minister could scarce be heard half way

Drills Drown the Sermon.

Instead was heard the hissing of escaping steam, the belching of the escape pipe and the groaning and clanking of machinery, possibly quite musical to those who owned the ground, but jarring like a discord on a mourful symphony on others, especially Rev. Mr. Mercer, the minister, who is said by an attendant to have reproached the con-gregation for its lack of sand. As sand is what the companies are seeking, they have probably monopolized the article. Mr. Mercer thought if all his hearers were animated as they should be Sunday work would soon stop. Meantime Constable Bakehouse of Sewickley was sent for. He is said to be valiant in the cause of Sunday sanctity, but for some reason Mr. Bake house's plume was not seen in Sharon Heights last Sunday, so it was decided that a Law and Order Society was the only thing that would work a remedy and it is said Rev. Mr. Mercer will be elected Presi

Higher up the river a white-hot crusade is being made against progressive euchre. Since the preachers have dropped the spirit-ual sword temporarily, J. D. Hamilton has taken it up and the Corsopolis Suburban blows a weekly blast against the pastime. The "sinners" begin to think they will be put into straight jackets ere long.

More to Fear Than Progressive Euchre. One of them, a member of a church, by the way, says that if some professed Chris-tians in that town did no worse than play progressive euchre the course of Christian would stand on a firmer foundation than it now does. He charges that Christis not so much crucified through card playing for amusement as by the financial practices of some professed Christians, who go more by the rules of conventional morality than by those of the Head of the Church. He refers to a very numerous class who hold that whatever is within the law is allowable, and that net is as comprehensive as the great sheet St. Peter saw let down from heaven by four corners in the city of Joppa, said sheet con-taining not only four-footed beasts of the earth, wild beasts and creeping things and lowls of the air, but almost everything that lies outside the gates of pearl, dogs, sorcerers, murderers and idolaters, and whosoever loveth and maketh a lie as well

as some other bad people enumerated by the apocalyptic drawer. These towns are considerably stirred up and by the time the next Legislature meets they may possibly arrive at some basis of settlement to recommend to Mr. Fow, though it is not likely the Legislature will take cognizance of progressive euchre.
long as it is not made a gambling game.

RHEUMATISM.

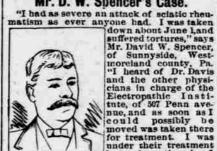

Acute, Sub-Acute and Chronic--Mr. Spencer's Case--The Six-**Dollar Rate Continued for the** Rest of the Year.

Pain may be general or local, in the mus-cles or in the joints. When in the joints there is some swelling, tenderness and stiff-ness; the suffering is increased by motion, due to a deposit, which, if permitted to con-tinue, will produce a stiff and immovable joint. In the more acute state these symp-toms are aggravated, with fever and pers-piration.

piration.

We do not know of a case of acute articu-We do not know of a case of acute articular rheumatism we have treated in the past six years which was not arrested in 16 hours. At least, no case should be allowed to run on more than 48 hours because of the incurable heart complications that follow (roughness and insufficiency of the cardiac valves), where the acute symptoms are permitted to exist for any considerable length of time. The physician who permits the symptoms of acute articular rheumatism to persist longer than 48 hours, nay, 24 hours, is not a good therapeutist. The sooner the acute symptoms are arrested the sooner the sub-acute symptoms subside and the less liable is the disease to recur. The past few years we have seen many deformed and crippled persons who would to-day have perfect use of their limbs if the necessary precautions had been taken during the first few hours of the disease.

Mr. D. W. Spencer's Case.

Diseases Mistaken for Rheum

Diseases Mistaken for Rheumatism.

Rheumatism is often mistaken for other diseases, especially gout; but gout is periodic, lasts about a week, attacks the smaller joints and affects the kidneys. Rheumatism attacks the Large joints, begins with exposure, lasts several weeks or months when not medically arrested, affects the heart but not the kidneys. Then there is the RHEUMATIO DYBGRABIA OR RHEUMATIC ARTERITIS, which is a separate and distinct disease, and has to be treated on a different principle. In this there is enlargement of the knuckles, thickening of the skin, especially at the palms of the hands, procuring construction of the fingers, pain in the heel tendon, burning pains in the soles of the feet and palms of the hands. Then again rheumatism is often mistaken for internal pain-producing tumors, disease of the bones and membrane that covers them, chronic maiaria, lead posoning, shingles, neuralgia, spinal disease and disease of the bladder. How many a poor patient has been burned and blistered along the scintic nerve, had the nerve time and again injected with hypodermics, and the nerve as a last fresort struched, all for "scintic rheumatism," when the seat of the trouble was at the neck of the bladder and the pain reflected down the thigh by a nerve indirectly connected with this great scintic nerve. But a physician well up in his diagnosis is not very liable to mistake either of these diseases for rheumatism.

Dr. Davis has returned from a short vaca-

Dr. Davis has returned from a short vaca Dr. Davis has returned from a short vaca-tion, and his many triends at the Electro-pathic Institute will be glad to see him per-sonally in the chair again. He has decided to continue the \$6 rate for treatment and medicine to all persons and for all diseases for the rest of the year.

The lowest charges. The most skillful treatment. The most extensive and thoroughly equipped Electrical Institute in Pittsburg.

ELECTROPATHIC INSTITUTE, 507 PENN AVE., PITTSBURG, PA. (DO NOT MISTAKE THE NUMBER.)

Dr. L. G. Davis and staff successfully treat all patients suffering from chronic ailments: NERVOUS DISEASES, RHEUMATISM, BLOOD DISEASES, paralysis, neuralizia, serorinia and CATARRE, and all diseases of the Eye and Ear. Operations in electrical surgery.

Ladies will find a trained female assistant in charge of their special department.

Office hours: 9 A. M. to 12 M., 2 to 5 P. M., 7 to 8.30 P. M. Sunday: 10 A. 5. to 4 P. M.
